The generation of any waste materials are a result of significant underutilization of resources and products. The intrinsic value can be unlocked through efficient and responsible management of waste.

While the Company's cement kilns offer a unique solution to address climate change by managing waste generated by societies and industries responsibly, it has made focused efforts within the boundary of its operations to segregate waste at source and conserve our natural resources through minimization of waste.

The following measures have been taken by the Company to manage significant waste in its operations:

E-waste:

The Company is not in the business of electronic consumer goods. However, the E-waste produced during the office operations is sold to the authorised recyclers.

Hazardous waste:

The hazardous waste generated is disposed through the authorised recyclers or disposers having permissions from State Pollution Control Boards.

Jute waste:

The Company utilizes in process jute waste as fuel for its captive power plant for the jute mill in Birlapur to generate steam and electricity.

Biodegradable waste:

Biodegradable waste generated at our premises is converted to manure through automatic organic waste composting machine.

Other waste:

Other non-hazardous waste such as steel scrap generated at the premises is recycled through authorised recyclers who provide valid certificates of the end use. Coal ash generated at captive power plants is utilized in-house as an additive to cement manufacturing.
