| 7. Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements (listed entity has flexibility regarding the placement of this disclosure)                                    | We are committed to operate as a responsible and sustainable business and also believe that ESG considerations are integral to our business strategy. We strive to conserve natural resources and promote biodiversity. In addition, we are committed to promote social sustainability by ensuring that our operations are safe, healthy, and inclusive for our employees and communities where we operate. We are committed to achieve the ESG targets by ensuring the operations are safe and healthy, by ensuring the high standard of governance practices that are aligned with the best practices and the regulatory requirements. It has been our long-standing belief that sustainability and growth go hand in hand and an organization's long-term success is to a great extent determined by how proactively it responds to its environmental, social, and governance dimensions. |                 |                 |                 |                     |                 |                                                        |                                     |                                     |            |     |        |                           |      |   |                          |      |      |

# 12. Describe the measures taken by the entity to ensure a safe and healthy work place.

The Entity emphasizes on the Occupational Health and Safety practices across all its business locations. In case of any unsafe acts and conditions are observed specific target dates are set for their resolution and closure. The Entity promotes 'speak up culture' as the employees are encouraged to share their concerns pertaining to any health and safety issues at their workplaces and discontinue their work, if required. Due to the Entity's focus on health and safety practices, we have been able to minimise the usage of hazardous chemicals at our manufacturing locations. The Entity employs the following methods to safeguard Occupational Health and Safety:

- Risk Assessment Activities;
- Work permit system;
- Frequent Training and awareness programs to employees on Occupational Health and Safety;
- Proper Ventilation, Air Handling Unit (AHU), provision of clean water at business locations;
- Safe Machine guarding as per Tenneco Emission security (EMSEC) standards
- Adequate Personal protective equipment (PPES) are provided as process wise PPE matrix.
- Regular EHS Audits are conducted at the manufacturing locations such as Gemba walks, safety patrols, Safety Committee Team rounds etc.

#### PRINCIPLE 4: Businesses should respect the interests of and be responsive to all its stakeholders

##### Essential Indicators

##### 1. Describe the processes for identifying key stakeholder groups of the entity.

We have stakeholder centric approach and have established a robust procedure to effectively engage with various internal and external stakeholder groups. As a prerequisite, we identify and prioritise our stakeholders, based on the impacts of the Company on stakeholders and the ability of stakeholder groups to influence the functioning of the Company.

Internal and external stakeholders have been identified that have a direct/indirect impact on the operations and working of the Company, which includes but not limited to Investors, Shareholders, Employees, Customers, Communities, Suppliers/service providers, Regulators/Government

##### 2. List stakeholder groups identified as key for your entity and the frequency of engagement with each stakeholder group.

**5. Has the entity implemented a mechanism for Zero Liquid Discharge? If yes, provide details of its coverage and implementation.**

The Entity has implemented Effluent Treatment Plants and Sewage Treatment Plants for treating the effluent stream generated from its processes and the sewage stream generated from the washrooms, canteen and hand wash stations. The treated waters are used back by the processes and part of the treated are used for irrigation inside the facilities. In Bhiwadi, the treated wastewater is sent to the central effluent treatment plant (CETP) approved by the state pollution control board, and the permeate water is received back from CETP for process use. The entity is not into discharging its wastewater from the premises.

**6. Please provide details of air emissions (other than GHG emissions) by the entity:**

Disclosure of Air Emissions:

We report energy consumption and GHG emissions through the CDP Climate Change questionnaire and measure our progress using multiple indicators to inform our strategies. We are monitoring the metrics through EHS Information System database.

We recognize our responsibility to take concrete action to address climate change, and we continue to assess and manage climate-related risks and opportunities for our business and value chain. With a significant operational footprint from our manufacturing processes, we are focused on limiting GHG emissions at our sites and contributing to sector-wide climate actions. In 2022, we continued to make progress toward carbon and energy intensity improvement in our operations, in line with our sustainability goals.

To align with best practices, we manage our global manufacturing sites in accordance with the ISO 14001 Environmental Management System and ISO 50001 Energy Management System standards. These frameworks provide guidance to improve our environmental performance and validate our approach through certifications.

*Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency: Yes, It has been audited by TUV SUD during ISO audits.*

**8. Does the entity have any project related to reducing Green House Gas emission? If yes, then provide details.**

Yes, the Entity has taken several initiatives to increase energy efficiency and reduce emissions. Some of the initiatives undertaken are as follows:

Reduction of energy consumption through various means such as introduction of energy efficient pumps; timer control for cooling tower fan motor control; replacing wet sand motor 7.5 kw with IE 2.2 kw; replacement of old cassette air conditioners with 5-star split air conditioners and with ODS free gases; blower motor introduction with temperature controller; introduction of VFDs in compressor room; maximize usage of renewable energy sources.

In addition to the above, following are the other initiatives those were introduced:

- Energy consumption reduction from 5.6 kvah/unit to 5.45 kvah/unit
- Holding Furnace Heater Control Thru PID Controller & Thyristor Drive
- Energy Efficient Pumps
- Cooling Tower Fan Motor Control Thru Timer control
- Power Saving On Blower Motor with Temp. Controller – Rotary Bath
- Power Saving On Blower Motor with Temp. Controller – Cell Bath
- All New Energy efficient compressor Installed with secondary containment.
- Capacitor bank Installed- maintaining of power factor=0.99 ( Power Cost saving )
- MS pipes replaced with Aluminium compressed Air Pipe line & 2Nos, VFD for Energy saving installed in Compressor Room
- Energy Efficient Pumps Installed above Ground . Earlier it was below ground & unsafe for people Changing of CO2 fire extinguishers to water mist in few areas
- Usage of renewable energy sources
- Elimination of kerosene oil, LPG to PNG
- Minimization of diesel consumption
- Optimization of PNG and electrical consumption
- Installation solar panel in vehicle parking area, dual fuel kit (with 70% gas- based fuels and 30% diesel) in generators.

**10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your entity to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.**

Yes, the Entity has implemented various actions to reduce the waste generation and at the source of generation. Those actions are as follows:

- Zero Landfill project by sending hazardous waste (ETP Sludge, Spent Chrome, Used oil and Oily Rags) to cement injuries for co-processing
- Oil filtration system
- Disposal of waste through authorized co-processors
- Conversion of grinding sludge into ferric acid through authorized agency
- Selling polythene waste and other waste to recyclers
- Reuse of treated wastewater into process
- Reuse of spent chromic acid from rotary bath

**11. If the entity has operations/offices in/around ecologically sensitive areas (such as national parks, wildlife sanctuaries, biosphere reserves, wetlands, biodiversity hotspots, forests, coastal regulation zones etc.) where environmental approvals / clearances are required:**
