PRINCIPLE 9 Businesses should engage with and provide value to their consumers in a responsible manner

Essential Indicators

1. Describe the mechanisms in place to receive and respond to consumer complaints and feedback.			We strictly follow SOP(SOP/PL/09) & MSC (MSC/PL/05/01) for handling the customer complaints & feedback. Physical Test Lab (Dept. Head/Div. Head) is the single point for handling customer communication through marketing team. Customer complaint or feedback was immediately communicated to all the concerned production & cross functional team for RCA & Quality records. Then RCA & CA identified through brainstorming session with the cross functional team. Accordingly, initial report shared with the customer through marketing about our findings which includes Root cause including 8D format, Corrective action & implementation plan. The same corrective action implemented within time frame & then final communication done with the customer about effectiveness of the corrective action already implemented within 15 days. The mechanism have been elaborated in our ISO 9001 policy documents. We recognise our customers as one of our most important stakeholders and hence have developed an approach to achieve absolute customer satisfaction.
