10 Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

We have implemented projects that have reduced waste and improved production yield. We follow the '3R' (Reduce, Reuse, and Recycle) strategy for waste management. We follow legally prescribed procedures and apply environmentally sound techniques for disposing of hazardous waste, whereas we sell non-hazardous waste to authorised recyclers. World-class practices such as TPM have been adopted at our manufacturing sites since 2003, which helps increase productivity by minimising waste. We empower our employees through the Waste Elimination Suggestion Award Programme (WESAP). This programme focusses on eight key waste streams, encouraging employees to offer suggestions for reducing and eliminating waste.
