BUSINESS RESPONSIBILITY & SUSTAINABILITY REPORT [BRSR] (CONTD.)

26 Overview of the entity's material responsible business conduct issues

Material Issues	Indicate whether Risk or Opportunity (R/O)	Rationale for identifying the Risk/Opportunity	In case of Risk, Approach to Adapt or Mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
Air Emissions and Quality	R	SOx, NOx, SPM, and particulate matter emissions from DG sets and boilers have been linked to serious health problems in India. Failure to monitor and comply with the norms prescribed by regulatory bodies' such as CPCB has a longterm negative impact on the environment and society, with heavy fines imposed.	CSTL continues to invest in state-of-the-art devices and upgrade to the latest systems used in mitigating and improving air emission quality. An in-house projects team facilitates efficient plant design and layout that has helped in optimum utilisation of energy consumption. We have implemented air emission mitigation measures like Electrostatic Precipitator and scrubbers provided to reduce stack emissions from Boilers. Innovative waste heat recovery systems are implemented that has resulted in reduction in emissions and nonrenewable input sources.	Negative
Climate Change	R	Over time, the effects of climate change have become more frequent and severe, and they now pose a growing risk to the entire world. Climate change-related extreme weather events put the Company's operations, infrastructure, as well as the health and safety of its employees, at physical risk. Also, the growth and profitability of the business may be hampered by economic disruptions brought on by transition risks. We must build a climate plan as the regulatory compliance requirements for carbon markets are evolving. Also, due to the nature of our operating activities, including logistics, we utilise a lot of energy. With the increasing importance of energy efficiency and to reduce energy consumption, CSTL can realise cost savings in operations while offsetting a significant amount of GHG emissions by implementing initiatives for the same.	CSTL has implemented various strategies and taken initiatives on regular basis to utilise resources efficiently, reduce waste and minimise emissions as part of our sustainability commitment. With a focus on "atom economy" and "clean chemistry", the Company has developed innovative catalytic chemical processes that have less impact on the environment. We strive towards minimising the disposal of water, emissions, and hazardous substances in nature. We focus on investing and continuously improving our energy efficiency across all activities (manufacturing and non-manufacturing) with an aim to reduce our overall energy requirement. Innovative waste heat recovery systems are implemented that has resulted in reducing non-renewable input sources. We have installed solar power projects with a capacity of ~17.7 MW that satisfy 67% of our power consumption. We have also invested in state of the art Round Disc Reverse Osmosis (RNRO), Multiple Effect Evaporator (MEE) and Mechanical Vapor Re-compression (MVR). One of our major goals is to reduce our carbon footprint. We have reduced green house gases (GHG) emissions over the last three years. We also aim to plant 35,000+ trees which will lead to Water Rejuvenation and Restoration in the surrounding area this will also help reduce carbon footprint.	Positive
Product Stewardship	O	It is vitally necessary for the chemical sector to address the risks related to product responsibly, given the high vulnerability of product quality and safety issues. Businesses have the chance to improve their products and address usage of hazardous raw materials, resource conservation, energy use, effluent disposal, and climate change issues. Companies may face additional costs as governments and international organisations implement numerous supply chain regulations to prevent counterfeit, substandard, or mislabeled products from entering the distribution system.	Clean and green chemistry is the bedrock on which CSTL is conceptualised. CSTL strives to manufacture products by developing innovative catalytic processes that are environmentally less impactful. The efforts made, help derive benefits like process improvement, cost reduction and less effluent generation. Using this approach CSTL can consistently launch new products. CSTL ensures the products have a proper labeling and display of information for consumer's safety. Relevant labelling on packing is also done indicating name of product, nature of hazards, prevention, storage requirements, disposal and usage of the product as identified in domestic/ international laws.	Positive

Material Issues	Indicate whether Risk or Opportunity (R/O)	Rationale for identifying the Risk/Opportunity	In case of Risk, Approach to Adapt or Mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
Waste Management	R	As a Chemical industry we are committed to reducing waste generation, managing it well, and following all regulations pertaining to both hazardous and non-hazardous waste. We believe that sound waste management is crucial for environmental protection. It is our responsibility to ensure that the waste generated from our facilities is segregated and disposed in the most appropriate manner.	The Company strictly adheres to the 3R process of reduce, recycle, and reuse. CSTL have set up state of the art ETP's in all its manufacturing sites along with a Glass house for handling of solid waste generated in ETP.	Positive
Water and Effluents	R	The chemical industry utilises water for a variety of processes and varying levels of water purity are necessary at various stages in the manufacturing process. We view it as our responsibility to cut back on freshwater use, water effluents, and increase the water reuse/recycling.	The Company strictly adheres to the 3R process of reduce, recycle, and reuse for water resources. CSTL has installed a rainwater harvesting system that stores the rainwater in underground water tanks, this water is filtered and used for internal consumption. Also, we focus on reducing process heat utilisation that has resulted in minimising the evaporation losses and reducing water consumption. All the plants of CSTL have achieved Zero Liquid Discharge (ZLD) status. Freshwater consumption has reduced over the last 3 years.	Negative
Community Engagement	O	Establishing relationships of trust with communities and making sure they participate frequently will help CSTL to contribute to social development and minimise any potential objections from the communities.	CSTL's CSR activities are spread across various focus areas such as Education, Healthcare, Medical Relief, livelihood enhancement and Environmental Sustainability.	Positive
Human Capital Management	O	Our people are a key factor in our growth and a pathway to our success. Together, we can accomplish more by fostering a culture of safety, employee involvement, and support for diversity in our workforce. The goal of CSTL is to be a company that attracts, nurtures, and retains brilliant and enthusiastic employees. We believe that a diverse workplace is necessary for organisational growth since it recognises employees' individual strengths and the abilities they bring to the table. CSTL recognises the need of having employees who possess the knowledge and abilities necessary for their positions as well as the industry, to ensure the organisation's longterm viability.	As a forward thinking Chemical Company, CSTL believes in harnessing the diverse talents and perspective of our team members, fostering an environment of abundant opportunities to grow, succeed and contribute to shared goal. Our comprehensive training programs viz. Technical, Behavioral and Managerial are designed to enhance employee skills boost moral and encourage creativity and innovation. Every team member, brings their own unique background, experiences, and perspectives. Our empowering work environment encourages our employees, creating an atmosphere of togetherness and passion for innovation. Currently women form 10% of our total workforce. We continuously identify internal employees who are put on fast track growth creating internal growth opportunities and success stories Our training programmes have led to increased productivity, fewer accidents/incidents, improved product quality and reduced rejection. We have mandatory in-house training targets across all functions for staff and workers.	Positive

Material Issues	Indicate whether Risk or Opportunity (R/O)	Rationale for identifying the Risk/Opportunity	In case of Risk, Approach to Adapt or Mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
Human Rights	R	Businesses that respect human rights show that they are dedicated to creating long-lasting, win-win partnerships with everyone who has an impact on or is influenced by their operations, including consumers, communities, employees, and investors. The Company's performance in the social domain from the perspective of the employee, workforce and community will be impacted by the absence of a comprehensive human rights governance structure from the aspects of parameters such as working conditions, child/forced labour, fair remuneration, gender diversity, prevention of sexual harassment, freedom of association, collective bargaining.	CSTL has a robust Code of Conduct, Whistle Blower, Human Rights Philosophy Policy, and POSH Policy that covers all the aspects of human rights. All these policies are applicable across vendors, subsidiaries, and affiliates	Negative
Occupational Health and Safety	R	Employees and workers at CSTL may be exposed to hazardous chemicals while they are working. In the worst-case scenarios, failing to maintain health and safety could increase the expense of litigation, limit the amount of available manpower, lower employee morale, or even endanger the profitability of operations. A robust EHS management system combined with thorough hazard identification, mitigation strategies, root cause analysis of reported occurrences, and related corrective action plans will highlight the Company's strategy and persistent commitment to employee health and safety.	For CSTL, employee health & safety is topmost priority. All the plants have achieved Zero Fatalities and there have been no breakdowns or shutdowns due to non-availability of manpower. CSTL has tie-ups with local physicians and hospitals to ensure that medical help is quickly available to all. Also, various initiatives are implemented for safety and health management of workers such as provision of health insurance, Safety trainings, Provision of good quality PPE kits, regular third-party safety audits, free medication, and regular health check-ups. MBBS certified doctor is available round the clock at factory premises.	Negative.
Procurement and Supply Chain Sustainability	R	Supply chain disruptions may result from inefficiencies in the system and a significant dependence on a small number of suppliers or vendors in the event of external shocks. By using good relationship management and encouraging ethical procurement/sourcing techniques, it is possible to maintain strong, longlasting relationships with suppliers and vendors.	CSTL procures the raw materials from reputed manufacturers and suppliers to maintain the quality and consistency. CSTL undertakes adequate steps to ensure safety during transportation and optimising the logistics to minimise environmental impact. CSTL has received sustainability certifications from EcoVadis, Responsible Care. We maintain long-term relationship with suppliers and robust inventory management practices ensure a steady supply of raw materials at competitive cost.	Positive
Business Ethics and Conduct and Corporate Governance	R	We operate in a complex environment which exposes us to risks concerning corporate governance and ethical business conduct. Any instance involving ethical business conduct may harm companies' reputation. Additionally, this could result in fines, penalties, and unfavorable financial effects.	CSTL considers Corporate Governance as an integral part of good management, and it strives to adhere to the best standards of integrity and ensure compliance and adherence to laws and internal policies. This enables transparency accountability, fairness and responsibility in operations. The Board of Directors has adopted a Code of Conduct Policy and Vigil Mechanism (Whistle Blower Policy) which applies to the Directors, Key Managerial Personnel, Senior Management, and other Employees of the Company.	Negative

Material Issues	Indicate whether Risk or Opportunity (R/O)	Rationale for identifying the Risk/Opportunity	In case of Risk, Approach to Adapt or Mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
Innovation and Technology upgradation	O	Technological advancements provides an opportunity to embrace new breakthroughs that can give an advantage in the marketplace and open new possibilities for long-term expansion.	CSTL has a strong team of 90 R&D professional including 9 PhD holders across its 4 R&D units who have expertise over different chemistries and are specialised across the value chain of research and process development. The key focus areas are developing sustainable and innovative chemical processes, further enhancing yield and selectivity in existing processes and develop novel route of synthesis with a focus on atom economy. The recently commercialised HALS series, antioxidants and DHTD are such examples.	Positive
Marketing and Labelling	R	Chemical industry produces products that need to have detailed description of the chemical components used for production to ensure safety of the users and consumers	CSTL abides to all the applicable statutory laws regarding product labelling and displays relevant information on product label. Relevant labelling on packing is also done indicating name of product, nature of hazards, prevention, storage requirements, disposal and usage of the product as identified in Domestic/International laws.	Negative

2. **a. Does the entity have procedures in place for sustainable sourcing? (Yes/No)**

- b. If yes, what percentage of inputs were sourced sustainably?**

Yes, approximately 80% of our critical suppliers are screened for sustainable sourcing. The Company has a Vendor Policy that include policy statement on EHS that defines criteria which the suppliers must adhere to such as provision of safe and healthy workplace for the supplier's employees & necessary trainings provided to the employees. The supplier must be compliant with all the applicable regulations and laws, and must have a mechanism to ensure that there is no violation of Human Rights. Supplier must comply with the environmental laws and ensure safe waste management, water discharge, and air emissions.

Further, the Company has undertaken following initiatives for sustainable sourcing:-

- Procurement of raw materials in bulk containers, tankers, jumbo bags leads to adherence of environment and safety standards that helps better utilisation of container trips resulting in lower number of trips.
- Long term contracts with suppliers leads to economies of operation and utilisation of available resources.
- Contract for supply of an essential raw material i.e. Green Hydrogen Gas has been executed.
- Sourcing of bulk products and storing in ISO tankers instead of drums results in reduce drum handling and adhere to safety and environmental standards.
- The Company has availed services for Single Window Track and Trace Platform for inbound (purchases) and outbound (sales) Transport vehicles. This provides 24*7 tracking of vehicles, overspeed, night driving, excess stoppages, idling, continuous driving. It also provides support to the driver to view key information like source destination, nearby emergency centers, hospitals, petrol pumps. This will provide performance tracking and take corrective actions, if needed, and will also give visibility and safety of export/import consignments once it reaches from factory to the port/destination.
