Water is one of the most essential resources sustaining human existence and we have implemented several water-saving initiatives and technologies across our hotels such as the installation of sewage treatment plants, low-flow fixtures at showerheads and toilets, and aerator based faucets. Through the effective implementation of Zero Discharge Mechanism across multiple hotels, we are reusing all the treated wastewater for horticulture purposes. 11. Waste Management	Risk	At EIH Associated Hotels Limited, we are aware of the environmental repercussions that may occur due to any negligence in waste handling. Inadequate waste disposal can cause habitat degradation, lead to pollution of air, water bodies, and soil, and pose serious health hazards to our employees and the communities.	Our waste handling and management system is guided by the 3R model- Reduce, Reuse, and Recycle. We take conscious and responsible efforts toward waste management, which includes proper separation of dry and wet waste, refrigeration of wet waste to delay spoilage, recycling of plastic and other waste to the maximum extent possible, disposal of e-waste and other hazardous waste to government authorized vendors and recyclers.	Negative Mishandling of waste may reflect negatively on our sustainability efforts, degrades the aesthetic appeal of our surrounding, directly impacting our relationship with our key stakeholders.
12. Impact on Biodiversity & Nearby Communities	Risk	We acknowledge the possibility of accidental impact that our operations may have on biodiversity and our nearby communities. Our occasional contribution to carbon emissions and reliance on natural resources such as water have potential environmental impact, affecting the biodiversity and local communities in the areas where we operate. Biodiversity acts as a natural and key force in combatting the adverse effects of climate change-one of the most pressing environmental issues. Additionally, the rich and distinctive landscapes and biological diversity in these regions is what captivates tourism, sustaining the longevity of our operations.	We ensure complete adherence with all the applicable statutory environmental regulations in our operations. Yes, As a part of our efforts to make judicious use of water in our operations, we have successfully implemented a Zero Liquid Discharge mechanism across five hotels in our network including The Oberoi Rajvilas, Trident Agra, Trident Jaipur, Trident Udaipur and Trident Bhubaneswar. To this end, we have commissioned advanced sewage treatment plants and technologies facilitating the treatment of wastewater across these establishments. We ensure that all the treated water is reused for the purposes of Irrigation, HVAC and other purposes. Additionally, we are actively working towards replacing conventional treatment plants with treatment plants based on advanced technologies and also towards including a separate piping system for use of recycled water within the building. Trident Chennai is equipped with adequate systems that ensure avoidance of discharge of untreated wastewater effluents thus enabling the reuse of recovered water to the maximum extent possible. The Oberoi Cecil is connected to the municipal sewerage system and the wastewater from the hotel is treated in the common municipal waste water treatment plant.

10. Briefly describe the waste management practices adopted in your establishments. Describe the strategy adopted by your company to reduce usage of hazardous and toxic chemicals in your products and processes and the practices adopted to manage such wastes.

We believe it is our responsibility and duty to operate our business in a manner that harnesses value, which is not only resource cautious but also is a derivative of our judicious strategy and decision making. Emerging from the rich roots of Indian culture for caring for natural resources and imbibing the modern facets of technology and culture. We are cognizant of the fact and ensures that our services do not include usage of any form of toxic or hazardous materials. Being in a hospitality service-based business, our operations do not generate any toxic or hazardous waste. We ensure responsible segregation and disposal of waste. Our approach to waste management is anchored by the 3R model - Reduce, Reuse, and Recycle.

Reduce: We have implemented various initiatives to reduce our waste generation. These initiatives are largely applicable to most if not all of our properties. Some of these initiatives include:

- Using cloth bags for collecting and delivering guest laundry, dry cleaning, and pressing. To collect waste, we use bio-degradable bags in most hotels. These small yet impactful initiatives have helped us reduce our plastic footprint significantly.
- We have also adopted paperless check-in and check-out systems where all necessary information of guests is recorded electronically on tablets, and customer documents are scanned rather than printed.

Reuse: To encourage the reuse of materials wherever and whenever possible, we have implemented measures like:

- Compost pits in hotels with large gardens to reuse organic waste
- Reusing all printed stationery, post screening and processing, as note pads, facsimile printouts, and posters for internal use

Recycle: Finally, we have implemented recycling programs for various types of waste, including:

- All stationery and shopping bags are made of recycled paper
- We segregate our waste into dry and wet. Wet garbage is refrigerated to delay spoilage and sent to piggeries, while dry garbage such as aluminum, paper, and plastic are sold for recycling. Dry waste is sent to authorized vendor for recycling.
- Organic waste converters have been installed in the majority of hotels facilitating processing of waste which is further reused as organic compost in horticulture.
- E-waste is collected and sent to authorized e-waste recyclers for safe and responsible disposal.
- Hazardous waste such as batteries, used oil from gensets are sold to or disposed of through authorized recyclers or waste in compliance with the legal regulations and guidelines.
- On-site wastewater treatment plant (ETP) and sewage treatment plants (STP) have also been installed in most of our hotels for managing wastewater.
- In house glass water bottling plant has been installed across many of our hotels to avoid plastic bottle uses.
