The Bank took many initiatives during the year, including technical training, managerial effectiveness improvement training, better onboarding of new joiners, skill building, cross functional mobility, feedback mechanism from employees, recognition programs and working on collaborative aspects of culture and calendarized employee connect programs for engagement. The Bank has continued to provide career progression, growth opportunities, compensation correction and recognition to employees. The Bank also delivered over 25 lakh learning hours during the year.

Around 28% of the Bank's staff are in rural locations, while 23% are in Branch Banking who are largely focused on customer servicing, relationship management and in building the deposit franchise of the Bank. These divisions largely have people in Account Opening and basic servicing roles where the median age is 29 years. This young age group usually has a higher attrition because of the fungibility of skills across industries such as sales roles in retail chains, telecom, platform companies and BPOs in the booming Indian service industries.

The Bank is seen as a growing and professional institution with positive work culture, which has helped attract and retain talent. Digitisation and automation have helped implement paperless processes, reduced consumption of paper through e-statements and e-receipts to customers and, therefore, reduced paper procurements. The Bank has empaneled certified vendors for managing its e-waste. The Bank has also adopted a strategy to reduce plastic consumables across its offices by eliminating plastic consumables and switching to reusable or sustainably sourced alternatives wherever possible.

Notes:**Green-house gas (GHG) footprint and Energy footprint**

- For the applied reporting year, fire extinguisher and refrigerant based emissions are reported in addition to the last year GHG stream i.e. GHG emissions from DG sets.
- The electricity data is reported based on the Bank's actual electricity consumption from 355 offices and branches out of 1329 locations. For the remaining 974 locations, it was calculated on the basis of spend based methodology following the [Industry Standards Note on Business Responsibility and Sustainability Report \(BRSR\) Core](#). The calculation of the unit price of electricity was appropriately applied to calculate the units of electricity. Finally, the total Scope 2 emissions was derived from the total units of electricity consumed.

Water footprint

- The raw water consumption is estimated based on the studies provided by the per day per employee water consumption as per CWGA studies (except 03 locations for Thane, Juinagar and Airoli).
- Actual water withdrawal is reported for 03 locations. For the remaining offices (1322 having active employees, and the 04 location were acquired in the month of march and employee deployment was under progress, so their water withdrawal had not been considered for reporting); the per employee headcount water withdrawal is estimated for the total working days of the reporting year.
- Actual water discharge is reported for 01 locations. For the remaining offices (1324 having active employees, and the 04 location were acquired in the month of march and employee deployment was under progress, so their water discharge had not been considered for reporting); the per employee headcount water discharge is estimated for the total working days of the reporting year.
- Actual water consumption is reported as water withdrawal minus water discharge.

Embracing circularity - details related to waste management by the entity

- For the reporting year, waste streams in addition to the "E-waste" and "Battery waste" are reported. Last year these waste streams were not reported in absence of backup monitoring data.
- The data disclosures for the waste stream (waste oil, paper, food, metal waste, battery waste etc.) reporting are based on the email received from the vendors for 03 locations.
- The data of these 03 locations is then extrapolated to calculate the waste streams from other location based on the number of employees at a particular location.

The reporting boundaries includes all the branches and offices in India. An on-site verification was conducted on date 28-30 May 2025. Remote assessment was also performed on dates 13-14 June 2025. The assurance activities were carried out together with a desk review of entire plants and offices as per reporting boundary.
