26. Overview of the entity's material responsible business conduct issues:

Please indicate material responsible business conduct and sustainability issues pertaining to environmental and social matters that present a risk or an opportunity to your business, rationale for identifying the same, approach to adapt or mitigate the risk along-with its financial implications, as per the following format:

S. No.	Material issue identified	Indicate whether risk or opportunity (R/O)	Rationale for identifying the risk / opportunity	In case of risk, approach to adapt or mitigate	Financial implications of the risk or opportunity (Indicate positive or negative implications)
1	Environment	Risk	Amendments to existing regulations, coupled with the introduction of new ones, have the potential to influence our material sourcing, emissions levels, waste management practices, and the manufacturing of finished products. Along with other environmental considerations, these changes could adversely affect our business operations.	Being mindful of the challenges presented by climate change and environmental concerns, the Company realign its strategies to ensure the continuity of its operations. Internally, several initiatives are focused on reducing carbon emissions and minimizing overall environmental impact.	Negative
2	Corporate Governance - Board oversight, conflict of interest, ethics and compliance.	Opportunity	The Company is deeply committed to upholding the utmost standards of governance. It is clear that long-term sustainability cannot be achieved without a robust governance framework and a culture of integrity. The demand for transparency, accountability, and fairness in governance regulations is on the rise, emphasizing the critical need for the Company to not only adhere to existing regulations but also prepare for forthcoming ones.	The Company has established systems, procedures, and policies to uphold governance standards effectively. The Company's Code of Conduct and Ethics Policy, Anti-Bribery Policies ensures that all workers and employees act with fairness in their official capacities. Moreover, the Whistle Blower Policy, Related Party Transaction policy and various reporting mechanisms play a crucial role in identifying and addressing any issues that may arise.	Positive

3	Sustainability	Opportunity	Environmentally friendly products are key drivers of long-term growth. Global challenges such as climate change, stratospheric ozone depletion, resource scarcity, bioaccumulation and the presence of persistent chemicals are being systematically addressed through sustainable practices. Furthermore, the Company remains committed to its social responsibilities and upholds the highest standards of professional conduct and workplace ethics.	As a green chemical Company with innovative technologies and a vision of long-term sustainability, not only the Company has adopted several green technologies, but continuously works to evolve new green methods, materials, innovative technologies, and systems to meet the specific requirements of valuable clients.	Positive
4	Handling Hazardous Material	Risk	Handling of hazardous materials throughout its operations to safeguard the health and well-being of its employees and to minimize any potential impact on the surrounding environment.	Adherence to standards pertaining to Occupational Health and Safety, the Company's Environment, Health and Safety ("EHS") Policy and highest operational standards for safe handling of hazardous materials. Periodic risk assessments and the execution of action plans accordingly.	Negative
5	Waste Management	Risk	The Company assumes full responsibility for the safe disposal of hazardous waste, as well as the proper disposal of non-hazardous waste. This responsibility is aligned with applicable environmental laws and sustainability commitments. Any lapse in adherence to these regulations may lead to significant legal, financial, and reputational consequences, including fines and penalties imposed by regulatory authorities.	The Company is dedicated to minimizing waste output and is working hard to lower its environmental impact. To achieve this goal, the Company has implemented various waste management practices, including: - Use of Briquette made out of plant waste in Dehradun Plant. - Collaborating with government-approved vendors for the collection and safe disposal of hazardous and other types of waste. - The Company have Zero Liquid Discharge ("ZLD") System Installation at its Distilleries at Kashipur and Gorakhpur as well as herbal extraction plant of Dehradun. - The Company is registered under Extended Producers Responsibility ("EPR") regime under Plastic Waste Management Rules, 2016 and has signed the agreement(s) with authorised vendors for collection of plastic waste. Hazardous waste is sent to authorised recyclers. The majority of hazardous waste, such as spent catalysts and used/waste oil, is recyclable and is responsibly sent to recyclers approved by the Ministry of Environment, Forests, and Climate Change ("MoEF & CC").	Negative
6	Health and Safety issues	Risk	Due to the inherent risks associated with handling hazardous chemicals and processes, safeguarding the health and safety of employees and workers is critical. Any untoward incident at the plant can endanger lives, disrupt operations, and adversely affect the Company's productivity and reputation.	The Company adheres to highest safety and operational standards as per its defined Standard Operating Procedures ("SOPs") and Policies for operations and handling of hazardous materials at plants. As per the policy adequate safety gears are provided to the staff working inside the Plants. Regular fire drills are conducted to familiarize the staff of the evacuation procedure. Routine revision of health and safety protocols and corresponding SOPs. Identification and continual improvements are integral process of the systems.	Negative

7	Raw Material Sourcing	Opportunity	A substantial proportion of the Company's raw materials are derived from green and bio-based , playing a crucial role in the creation of our finished products. These materials inspire us to pursue our business objectives by crafting sustainable goods and solutions that minimize our environmental footprint.	Continuous efforts to source alternate green feed stocks and also looks for alternate geographies. Further, the Company continuously strengthen its R&D team to develop more sustainable products with alternate Bio-based and sustainable Raw Materials.	Positive
8	Stakeholder engagement	Opportunity	Opportunity to connect with and look for Stakeholder inputs.	A procedure for engaging with stakeholders has been created and is being followed. The Company has an ongoing stakeholder engagement approach.-	Positive
9	Cyber Security	Risk	As the business expands, the company faces increased risks of data breaches and cyber threats, as well as challenges pertaining to data privacy and protection.	The Company has implemented several proactive measures to enhance the cybersecurity of its information assets. This includes deploying essential infrastructure, tools, and backup strategies to mitigate cyber risks effectively.	Negative

Governance, leadership and oversight		
7	Statement by director responsible for the business responsibility report, highlighting ESG related challenges, targets and achievements.	IGL has embarked on an unwavering journey toward sustainability over the past year. At the core of our operations lie a strong ethical governance. We prioritize transparency and accountability to our stakeholders, implementing a stringent corporate governance framework and maintaining open channels for stakeholder engagement to address their concerns and feedback. Upholding the highest standards of ethical conduct and compliance with relevant laws and regulations remains a cornerstone of our ethos. Fully cognizant of our social responsibility, we have instituted enduring measures to enhance the safety and security of our working environment. Our focus extends to the well-being of both our employees and the communities we serve. We have bolstered our employee wellness programs and championed diversity, equity, and inclusion, underscoring our dedication to societal commitments. Furthermore, our support for local communities is unwavering, demonstrated through contributions to various social welfare programs and disaster relief efforts. Our commitment to reducing our environmental footprint has led us to amplify efforts to conserve energy and reduce energy consumption, minimizing water consumption and waste generation. Considering the impact of climate change we are focusing to increase our renewable energy sources. These initiatives have significantly curtailed our carbon emissions, propelling us closer to our goal of becoming a carbon-neutral company. We acknowledge the extensive journey ahead in realizing our aspirations and commitments. We persist in addressing our challenges. We remain convinced that integrating sustainability into our operations will create enduring value for our shareholders and foster a more sustainable future for all.

	FY 2024-25	FY 2023-24	Details of improvements in environmental and social impacts
R&D	96.93%	42.69%	Reduction of greenhouse gas emission into the environment. Developing products to enhance overall human wellbeing. New Technologies and Products.
Capex	14.70%	2.34%	Controlling particulate matter dispersion. Reduction in consumption of steam, power and natural resources such as water, fossil fuel etc.

2. a. Does the company have procedures in place for sustainable sourcing?

Yes. The Company believes in and follows Integrated Management System Policy with utmost focus on environmental and social aspects. The Company ensures maximization of sustainable raw materials and energy conservations.

The Company uses molasses, a sugar plant residue/waste, broken rice as major raw material, which is 100% bio-based material for operating its distilleries. The Company uses Bio-based raw materials and Ethanol is one such key raw material, whereas in conventional process Petro route is used for production of Ethylene Oxide (EO)/ Mono Ethylene Glycol (MEG) and others, throughout the globe. For its Ennature Biopharma business, various herbal raw material are either cultivated (through farm contracting) or sourced in the sustainable manner.

The Company uses waste base ethanol as a raw material for our key products - Glycols and Ethylene Oxide and other specialty chemicals.

The responsible sourcing of raw material, their properties, performance and content of these materials make a significant contribution to reduced environmental impacts such as lowering carbon emissions and minimize use of the earth's limited resources.

Sustainable solutions are based on number of defined action plans and standards based on Life Cycle Assessment ("LCA") methodologies. India Glycols sustainable solutions for responsible sourcing of raw materials enables customers to confidently choose high-performance materials that advance their environmental and business goals.

b. If yes, what percentage of your inputs was sourced sustainably?

Depending upon the various raw materials and quantities the inputs are around 90% sustainable. The percentage varies from plant to plant.

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging) (b) E-waste (c) Hazardous waste and (d) other waste.

The Company follows the applicable processes laid down by the regulatory authorities. The Company is registered under Extended Producers Responsibility (EPR) regime under Plastic Waste Management Rules, 2016 and has signed the agreement(s) with authorised vendors for collection of plastic waste. Further, the Company supplies its product in barrels, flexi-bags, ISO tanks and pet bottles. Flexi bags are used for transporting and shipping products in bulk, depending on the requirement of customer. Mostly flexi-bags are recyclable thus consider as environment safe. Hazardous waste is sent to authorised recyclers.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.

- Occupational Hazard & Risk Assessment** - Company operates a range of rotating, static, cryogenic & pressurized equipment that may pose occupational hazards. Additionally, the handling of hazardous chemicals and hydrocarbons on site, including pressurized systems, carries potential risks such as leakage, spillage, fire, exposure, and other safety related incidents.

Mitigation Measures: Periodic hazard identification and risk assessments related to facility operations and process activities are conducted. Based on the severity and nature of the risks identified, appropriate control measures are determined and implemented. Risk mitigation strategies follow the Hierarchy of Controls as per OHSMS guidelines—namely, Elimination, Substitution, Engineering Controls, Administrative Controls, and the use of PPEs. All defined corrective and preventive actions are systematically executed.

- Process Hazard & Associated Risk-** Given the nature of operations, the chemical plant manages various process-related hazards and handles hazardous chemicals, posing potential risks such as fire, explosion, or toxic release. While such incidents occur infrequently, their consequences can be severe and potentially catastrophic.

Mitigation Measures: Company has “disciplined management system framework for managing the integrity of operating systems and processes that handle hazardous substances. This framework aims to prevent unplanned releases of hazardous materials or energy that could compromise structural stability and lead to major incidents. The Company has well established mechanism for employee participation, ensuring a comprehensive understanding of process related hazards. The Company has established detailed operating procedures and conducts regular safety and process training programs. Furthermore, systematic assessments such as Hazardous and Operability Study (“HAZOP”), Quantitative risk assessment (“QRA”), Management of Change (“MOC”) and Pre-startup safety review (“PSSR”) are conducted for new projects and modifications, with due consideration of associated risks. All activities plant premises are carried out only under defined safety work permit system.
